Vegetable Universal Remedy

FOR THE PILES!

A Cure for Life Secured.

For the cure of Piles, Obstruction of the Liver and Spleen Affections, Scrofula and Diseases of the Stomach, Bowels, Kidneys and Urinary Organs, Female Irregularities, Dropsy, Dyspepsia, Rheumatism, Hypocondria, Fits, Headaches and Inflammation of the Spine, and for the relief of Married Ladies

THE VEGETABLE PILE ELECTUARY, invented by Dr. S. Upham, of the most distinguished Physician of New York city, is the only really scientific remedy for that dangerous and distressing complaint the Piles, ever offered to the American public.

Such has been the DEMAND for the ELECTUARY, and such the success of its operations, that it has become a regular business with many druggists to keep it constantly on hand, and to supply it to their customers as they would any other article of trade. Many of the most respectable physicians in the country have also become agents for the sale of it, and use it in their practice. Indeed, the Electuary has become so well known, and its virtues so universally acknowledged, that it is now considered unnecessary to publish certificates in favor of it. Suffice it to say, that it has never been known to fail in a single instance, when taken according to the directions, to effect a perfect and permanent cure of the worst case of Piles, however long standing. Many who have been afflicted with this dreadful disease for years, and had tried almost every thing else without effect, have been entirely cured by the use of a few boxes of the Electuary. Others who had suffered for years, and had undergone the painful operation of cutting, have been entirely relieved by the use of a few boxes of the Electuary, without the necessity of cutting. Others who had been troubled with the Piles for 10 years past, and had tried almost every thing else without effect, have been entirely cured by the use of the Electuary. Others who had been troubled with the Piles for 20 years past, and had tried almost every thing else without effect, have been entirely cured by the use of the Electuary. I have been a great sufferer from the Piles for 10 years past, and had tried almost every thing else without effect, have been entirely cured by the use of the Electuary. I have been a great sufferer from the Piles for 10 years past, and had tried almost every thing else without effect, have been entirely cured by the use of the Electuary.

DYSPEPSIA AND LIVER COMPLAINT.

GREAT SUCCESS OF UPHAM'S PILE ELECTUARY.

Whig and Courier.

John S. Sayward, Editor.

FRIDAY, SEPTEMBER 24, 1847.

Maine's Approval of the War.

The loco foco's and presses seem determined to make it out that Maine, at the recent election, did not manifest hostility in the way of approving the war with Mexico. This is a tempting ground for a large business on a small capital for with the largest share so disposed and to the party, so essential to the leaders, as well as to the office holders, and with all the appendages which these all would bring, to bear upon the party, there was less by between two or three thousand votes than last year when they failed to elect their governor by the people and nearly lost the legislature.

The only salvation for a Baron to defeat to the loco party was that the Whig and the Liberty not fell off so much as they feared the Whigs come out in their strength as it was their duty to have done, and as we for one earnestly urged them to do, and as we can and no good excuse for their not doing and had the Liberty party have kept up their strength—there would not have been enough left out of the old party to have injured

Such a result as this, which only a small proportion of the vote would turn, naturally matter of surprise to the whole country and to be taken as a sign of the times in favor of the war!

The Whigs of Maine who voted for the administration of this state certainly the day of the election in this State, through every, but in that an excuse for their staying away from the polls. The day was rainy to be sure, but that should not prevent a party man at home who was able to be about. There was a public business to be necessary to bring out the Whigs. They should from by the same that their political principles are nothing worth if they can't use their votes. Let the Whigs of Maine remember this, and it will not hurt the Whig cause in the States to think of Lamb the Lightner.

Penobscot Bank.

We learn that Samuel Veazie, late President of the Bank of Bangor of this city has resigned his franchise to the Penobscot Bank and Daniel Pingree President of the Warwick Old Bank of Salem Mass at the annual meeting By this transfer Mr Bingham Bodey of Oldtown and the most respectable and trustworthy business a liberative and responsible place in the State of Maine and we congratulate those concerned in the business in which the selection can properly and individual. Mr Lewis Young is a late former from town Boston Master under Gen Vazie and has given very general satisfaction. The banks have very much profitable property connected with it and it will yield a handsome income to the revenue of $100,000. Mr Body a few days since drew two checks on Mr Pingree for the consideration of the purchase one for $27,000 in gold and the other for the remaining half in a few months time

☞ The editor of the Gazette in alluding to the letter of Hon Sanford Kingsbury written in answer to a letter of inquiry addressed to him by Ebenezer Gallison meanly talks about Death bed repentances. Now there is nothing in the character of the letter which should lead any man even the bitterest political opponent of possess to the article of hoax to characterize it as a Death bed repentance

Ebenezer Gallison we should judge from his office not having any personal acquaintance with him a man of sense. He is according to the Gazette a Locofoco party man. He addressed a letter to Mr Kingsbury—he chose his own time—he framed the letter to suit himself—he desired an answer. Mr Kingsbury has never concealed his opinions but upon being interrogated he promptly and plainly answered. For this the Gazette snarles and says that death bed repentances are apt to be insincere? Grant it. But what is there in the letter of Mr Kingsbury like repentance of any kind? He had nothing to the premises to repent of. For all that appears and undoubtedly for all that exists he will have given his views at any time to whomsoever should have asked. And yet the Gazette is about the slightest authority and for no cause, manly impotent spirit to Mr Kingsbury for answering a letter addressed to him by one of the Gazette's own party.

But suppose Mr Kingsbury had or could have answered the letter as the Gazette intimates it would have been better for his party and better for him to have done. why then, the Gazette would have found a horse of another color and the way it would have displayed itself would have been a caution to all who conceal their opinions.

We cannot but think that there is a little envy in the way of malignity in the notice of the Gazette made it appears a long way after the election transpired. But we must expect something of this kind from an editor who can at the polls sit both liberty and Loco votes.

By the by, we notice a very good way the Gazette has of attempting to turn a point. Last week it engaged the Standard a Locofoco party paper published at Hallowell, with ultra Locofocoism. The editors of these two papers are both members of outer churches, and the language of the Gazette seemed to us rather strong, under the circumstances for remark.—Now the Gazette represents that we thought it particularly brave in its editor to differ from the Standard. Such a difference of such of whole at expressing it we hope may not be common among the Whig printers. We not upon no claim of originality with the Gazette. Its editor wrote original—so very original that he was ridiculous. We have laughed over many of his original lines and know of others who have had many to weep over.

☞ Gen Tom Hamlin leaves in the Gore now this morning on a visit to the Division of Portland. He has had a brilliant time of it in this city—has been thronged with visitors and afforded much entertainment. He offered one reward of $500 for any child as small as himself who might walk. The next day Mr Hamlin's boy took his little daughter into the room. She is fifteen months old in her shoes but a half weighs 70 lbs. The General was planted with the opponent gave her a kind and abhorred her father than the affair of a rejected and born withdrawn.

☞ If he were in good town, we have a party of gold seekers day, for this kind of [illegible] unusually at no rate.

Mr. Spencer on Annexation.

A late number of the National Intelligencer contains a letter from Hon John C Spencer which forms another chapter in the history of an annexation. The Intelligencer remarks that no reasonable doubt can remain that of the facts lately the south it was known at the time of these occurrences when it did not never without the consent of Mexico. Mr Spencer after correcting the statements of Mr Hyde in relation to the annexation question concludes with the following

"I have only to say in conclusion, that I have never had any conversation with any person in authority, or out of authority, in relation to the annexation of Texas to the United States, which I have not communicated to the President, or to the Secretary of State, or to the Cabinet, or to the Senate, or to the House of Representatives, or to the people of the country. That I have declared it proper to treat with the state for annexation openly and publicly. That I have invited to the discussion persons of all parties in the country, that I have called for the opinions of the people, that I have in no instance taken a step in relation to annexation in secret, that I have not communicated with the President, or with the Cabinet, or with the Senate, or with the House of Representatives, or with the people of the country, that I have not done all that I could do openly and publicly to promote annexation, and that I have not done anything which I would not have done openly and publicly before the whole world."

Mexican Sentiments.

RUST PROOF IRON,

FOR

ROOFING, WINDOW SHUTTERS, &c

THE subscribers beg to call the attention of all those interested in roofing, to their GALVANIZED IRON PLATES and to the many advantages which they possess over all metals and other substances hitherto used for this purpose. Possessing as they do, the strength and lightness of iron without its liability to rust, having now been in use several years, both in this country and in Europe. They are also less subject to expansion and contraction from sudden changes of the atmosphere than common Tin Plate Iron, Zinc, &c, or any other metal now used for roofing, and consequently form a much better and tighter roof, requiring far less frequent repair, whilst the first cost is less than tin

The subscribers would also call the attention of all clergymen and workers in metals, to the many other purposes to which Iron thus protected, can be applied In general terms, it is applicable to all articles of iron which it is desirable to protect from the action of the atmosphere And they would especially call the attention of those interested in TELEGRAPHIC LINES, in Great Britain and Europe, and which answers every purpose as a conductor of electricity, costing only about one half as much as copper, and possessing equal durability with that metal

Having lately erected works in this city for the purpose of galvanizing Nails, Spikes, Bolts, Wire &c, they will be able to furnish any article which may be desired A supply of Plates (manufactured in Europe,) constantly on hand, from 6 to 22 wire gauge GEO B MOREWOOD & CO,

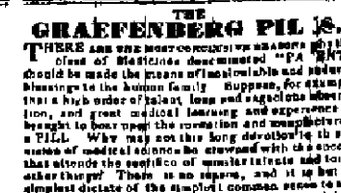
"Examiner" for March.

THIS No celebrates and unusual number of this 4 and interesting weekly. Published by the subscribers, who are the Sole Agents for the work G B SMITH & CO



THE GRAEFENBERG PILLS.

THERE are the most successful remedies of that class of Medicines denominated "PATENT," should be made the means of incalculable and enduring blessings to the human family Suppose, for example, that a high order of talent, long and sagacious observation, and great medical learning and experience are brought to bear upon the invention and manufacture of a PILL Why may not this long devotion to the science of medical science be crowned with the success that attends the sacrifice of similar talents and toil in other things? There is no reason, and it is but the simplest dictate of the simplest common sense to say that a Pill thus produced will be as perfect an article as can be made by man. Twenty-five years devotion to any one subject will give a man of ability the mastery over it. This labor has been bestowed upon the

Graefenberg Vegetable Pills

and they are presented to the public with claims superadded to the whole history of medical science

It will be seen, in tracing the history of all great inventions, that they were not made or discovered until the arrival of what may be termed THE MOMENT FOR THEM The mariner's compass, for instance, was not invented until in the "Fullness of time" it was needed The *locomotive* steam boat was not, but the moment keen what a wonderful and unerring guide was found in its ardent bosom, and the Divinely appointed times drew near when distant continents and islands were to be unveiled Behold it now transferred to the bosom of the adventurous sailor, enabling him to launch far away upon unknown Oceans, brave all of tempest, marked, resistless and Providential

☞ In MEDICAL SCIENCE THE SAME GREAT PRINCIPLE PREVAILS IN ADMIRABLE MANNER But how fearful are the illustrations and proofs of this which are to be found in the history of the world. We pass to see them from the Mosaic dispensations down to the present hour, all of them teaching us the lesson and giving us the hope that *something yet better to heal burns and sadness* is at hand.

This the principle is the test of Medical and of Physical science is clearly shown in the
